SUMMARY

AI-agent and automation practitioner who designs and operates production workflow systems and governed multi-agent build orchestration. Hands-on experience spans n8n, prompt and model routing, MCP configuration, self-hosted PostgreSQL/Supabase, Docker, and Cloudflare deployment. UBC-trained electrical engineer and EGBC Engineer-in-Training with infrastructure project coordination experience and an engineering-first approach to secure, testable delivery.

CORE SKILLS

AI & Automation: n8n, multi-agent orchestration, prompt engineering, MCP configuration, Ollama, scheduled agent execution

Backend & Data: Python, FastAPI, SQLAlchemy, Pydantic, PostgreSQL, Supabase, SQLite, SQL, hand-written RLS policies

Application Development: TypeScript, JavaScript, Next.js, React, Astro, Playwright, pytest, REST APIs, webhooks

Infrastructure & Delivery: Docker, Docker Compose, Cloudflare Workers and Pages, Wrangler, Git workflows, gated verification

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Production WhatsApp Automation and CRM Operations

- Designed and operate Auretris, an n8n workflow set that answers prospective-student FAQs and routes leads in a live multi-tenant service used by two clients.
- Customized, extended, and operate Kuanli, a forked open-source CRM using Next.js, TypeScript, self-hosted Supabase/Postgres, hand-written RLS migrations, Docker Compose, and Ollama.
- Published a sanitized Auretris architecture and operations overview; production workflow exports, client data, credentials, and deployment configuration remain private.

Multi-Agent Orchestration and Agent Operations

- Designed an original R0–R5 review and approval workflow with role-based routing across Claude Opus, Sonnet, and Codex, supported by custom agents and skills.
- Administer an always-on Hermes agent runtime with multiple profiles, cron scheduling, Docker and Singularity sandboxes, kanban orchestration, and MCP-based build coordination.

AIOS Business Operations Platform

- Operate a customized fork of the open-source AIS-OS starter kit as the operational hub for Skeure Education, a business run directly by Pratham.
- Developed original layers around the fork: a production Astro and TypeScript site deployed through Cloudflare Pages and Claude–Codex orchestration tooling with locking and durable logs.

Pantheon Automated Build Pipeline

- Designed and operate a three-gate AI build pipeline covering security, race-condition, seed-integrity, and accessibility verification.
- The pipeline produced a Python/FastAPI/SQLAlchemy travel-planning application and a JavaScript/PocketBase PWA under Pratham's direction and formal review gates.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD pathway and routing design for commercial and municipal fiber-optic projects, including FTTN and FTTH infrastructure.
- Interpreted site surveys, prepared material take-offs, and performed QA on engineering drawings for projects in Vancouver, rural Alberta, and Vancouver Island.
- Coordinated with field teams during installation and commissioning activities.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering — University of British Columbia | Conferred May 2024

MBA Candidate — Lovely Professional University | In progress; expected 2027

Engineer-in-Training — Engineers and Geoscientists BC | 2024–present

Canadian work authorization: Open Post-Graduate Work Permit for any employer, valid through June 6, 2027
