SUMMARY

Electrical Engineering graduate and automation practitioner with hands-on experience operating modest-scale production systems for live clients. Designs risk-graded AI-agent workflows, administers self-hosted containerized applications, and coordinates technical delivery across software, business, and electrical-infrastructure settings. Brings disciplined documentation, verification, and operational practices, supported by an EGBC Engineer-in-Training credential and an MBA in progress.

CORE SKILLS

Production Operations: Docker and Docker Compose, self-hosted Supabase/PostgreSQL, n8n, Ollama, Linux-based agent environments

Automation & Technical Governance: Multi-agent orchestration, per-role model routing, prompt engineering, risk-graded review and approval workflows

Cloud & Applications: Cloudflare Workers, Pages, Tunnel, and Wrangler; Next.js, React, Astro, TypeScript, Python, SQL

Quality & Coordination: Security and integrity checks, accessibility testing, durable run logs, drawing QA, revision control, field-team coordination

SELECTED PROJECTS & OPERATIONS

Custom Claude Code Multi-Agent Workflow

- Designed and operate an original R0–R5 review and approval workflow that routes work among Claude Opus, Claude Sonnet, and Codex according to defined roles, risk, and governance requirements.
- Authored reusable skills and role-specific routing policies for drafting, architectural review, implementation, and solution review within a production-business automation environment.

Pantheon Automated Build Pipeline

- Designed and operate the automated build pipeline that produced FastAPI/SQLAlchemy and JavaScript/PocketBase applications under Pratham's direction and formal review gates.
- Established a three-gate verification protocol covering security checks, race-condition tests, seed integrity, and accessibility; the animal-rescue application alone includes more than 30 verification scripts.

Auretris & Kuanli | WhatsApp Automation and CRM

- Operate n8n chatbot workflows and a customized open-source CRM fork for a live, multi-tenant SaaS product serving two clients, using Next.js, self-hosted Supabase/PostgreSQL, Docker Compose, and Ollama.
- Wrote PostgreSQL row-level-security migrations and published a sanitized Auretris architecture and operations overview; production workflows, client data, credentials, and deployment configuration remain private.

Business & Automation Operations | Skeure Education and Indian NBFC

- Operate two businesses with direct P&L and operational exposure while applying automation to education-consulting workflows and financial-services planning.
- Run a forked AI-operations hub for Skeure Education, complemented by an original Claude–Codex bridge with ask, review, and implementation modes, durable logs, and a single-writer lock.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Produced AutoCAD pathway and routing designs, interpreted site surveys, prepared material take-offs, and performed drawing QA for commercial and municipal FTTN/FTTH projects.
- Coordinated field teams during installation and commissioning for work spanning Vancouver, rural Alberta, and Vancouver Island fiber and ICT infrastructure projects.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team while providing mechatronics support.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — Conferred May 2024

MBA candidate, Lovely Professional University — In progress; expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization: Open Post-Graduation Work Permit valid through June 6, 2027
