SUMMARY

Automation and AI-agent engineer who designs and operates production systems for real businesses, supported by an electrical-engineering foundation and direct financial-services operating experience. Hands-on with Python, TypeScript, SQL, APIs, n8n, Postgres, Docker, and Cloudflare. Experienced in translating operational needs into deployed workflows, administering multi-tenant infrastructure, and applying risk-graded review to AI-produced software. Based in Vancouver with an open Canadian Post-Graduation Work Permit valid through June 6, 2027.

CORE SKILLS

AI & Automation: n8n production workflows, multi-agent orchestration, Claude, Codex, Ollama, prompt engineering, per-role model routing

Languages & Applications: Python, TypeScript/JavaScript, SQL, FastAPI, SQLAlchemy, Next.js, React, Astro, APIs and webhooks

Data & Infrastructure: PostgreSQL, self-hosted Supabase, hand-written row-level-security migrations, Docker Compose, Cloudflare Workers, Pages and Wrangler

Finance & Delivery: lending and ledger operations, regulated NBFC environment, workflow scoping, stakeholder coordination, gated verification

SELECTED PROJECTS & OPERATIONS

Auretris, Kuanli and Client Automation

- Design and operate Auretris, an n8n-based WhatsApp AI chatbot that answers prospective-student questions and routes leads for live clients, including an education consultancy and Skinitutes.
- Customized, extended and operate Kuanli, an open-source WhatsApp CRM fork using Next.js, TypeScript and self-hosted Supabase/Postgres; administer its Docker, database and workflow infrastructure. The public Auretris repository provides a sanitized architecture and operations overview, while production workflows, client data, credentials and deployment configuration remain private.

Multi-Agent Build and Verification Pipelines

- Designed a risk-graded R0–R5 workflow that assigns architecture, implementation and review work across Claude Opus, Claude Sonnet and Codex, supported by custom skills for routing, prompt drafting and solution review.
- Designed and operate the Pantheon automated build pipeline that produced a FastAPI/SQLAlchemy travel-planner application and a PocketBase-backed animal-rescue PWA under a formal three-gate protocol covering security, concurrency, seed integrity and accessibility checks.

Business and Financial Operations

- Operate an Indian NBFC with direct exposure to lending, ledger operations and the regulatory environment; specified a planning-stage, ledger-first WhatsApp assistant with read-only and no-auto-write safety boundaries.
- Operate Skeure Education with direct P&L and operational exposure while administering its forked AIOS hub, live Cloudflare Pages website and original Claude-to-Codex orchestration tooling.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Produced AutoCAD pathway and routing designs, interpreted site surveys, completed material take-offs and performed drawing QA for commercial and municipal FTTN/FTTH projects.
- Coordinated field teams during installation and commissioning across the Granville–Broadway ICT upgrade, rural Alberta telecom expansion and Vancouver Island fiber-backbone work.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, schedules and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

University of British Columbia — Bachelor of Applied Science, Electrical Engineering, May 2024

Lovely Professional University — MBA candidate, expected 2027

Engineers and Geoscientists BC — Engineer-in-Training, 2024–present
