SUMMARY

Automation and AI-agent engineer who ships and operates workflow systems for live businesses, backed by a UBC electrical-engineering foundation. Experience spans production n8n automation, self-hosted data infrastructure, multi-agent orchestration, client operations, and field coordination. Runs two businesses while completing an MBA, bringing a practical understanding of ambiguous workflows, operational constraints, and the tradeoffs between an agent, an integration, and a simpler script.

CORE SKILLS

AI & Automation: Python, TypeScript/JavaScript, n8n, multi-agent orchestration, Claude Code skills, MCP configuration, Ollama local inference

Systems & Data: SQL, PostgreSQL, self-hosted Supabase, hand-written row-level security policies, Docker, Docker Compose, REST APIs, webhooks

Cloud & Quality: Cloudflare Workers, Pages, Tunnel, Wrangler, Playwright, pytest, Vitest, accessibility and security verification

Operations & Engineering: Workflow scoping, live-client support, field-team coordination, AutoCAD, material take-offs, FTTN/FTTH infrastructure

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — WhatsApp Automation and CRM

- Designed and operate Auretris, a live multi-tenant n8n workflow set that answers prospective-student questions and routes leads for two production clients.
- Customized, extended, and operate Kuanli, a forked open-source Next.js and TypeScript CRM, using self-hosted Supabase/PostgreSQL, hand-written RLS migrations, Docker Compose, and local Ollama inference.
- Published a sanitized Auretris architecture and operations overview; production workflows, client data, credentials, and deployment configuration remain private.

Multi-Agent Build and Review Pipeline

- Designed and operate an original risk-graded R0–R5 workflow that routes work among Claude Opus, Claude Sonnet, and Codex according to defined implementation and review roles.
- Authored supporting Claude Code skills for routing work, drafting prompts, onboarding universities, and reviewing solutions within the governed production process.

Skeure Education — Operations and Automation

- Operate a customized fork of an open-source AI-operations hub as the backbone of an education-consulting business, alongside a production Astro, TypeScript, and Tailwind site deployed through Cloudflare Pages and Wrangler.
- Built an original Claude-to-Codex bridge with ask, review, and implement modes, a single-writer lock, durable run logs, and an external SEO MCP data source.

Skeure Education & NBFC — Business Operations

- Run two concurrent businesses spanning education consulting and Indian non-banking financial services, providing direct exposure to operating workflows, P&L considerations, lending and ledger processes, and regulatory constraints.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Produced AutoCAD-based pathway and routing designs, material take-offs, and drawing QA for commercial and municipal FTTN/FTTH projects.
- Interpreted site surveys and coordinated field teams during installation and commissioning across Vancouver, rural Alberta, and Vancouver Island infrastructure projects.
- Supported the Granville-Broadway ICT upgrade, rural-Alberta telecom backbone expansion, and Tofino/Campbell River fiber backbone upgrade.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — Conferred May 2024

MBA candidate, Lovely Professional University — In progress; expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization: Open Post-Graduation Work Permit valid through June 6, 2027; authorized to work for any employer in Canada.
