SUMMARY

Automation and AI-agent engineer who designs and operates production automation and multi-agent systems for live businesses and clients. Brings hands-on experience with WhatsApp workflows, self-hosted application stacks, agent orchestration, gated software delivery, and client operations, backed by an electrical-engineering degree and professional engineering credential. Comfortable translating operational needs into scoped systems, coordinating stakeholders, and applying verification gates to AI-pipeline-produced software.

CORE SKILLS

Agentic AI & Automation: Multi-agent orchestration, per-role Claude Opus/Sonnet and Codex routing, n8n, MCP configuration, prompt engineering, Ollama, Hermes runtime administration

Languages & Frameworks: Python, TypeScript/JavaScript, SQL, FastAPI, SQLAlchemy, Pydantic, Next.js, React, Astro

Data & Infrastructure: Self-hosted PostgreSQL/Supabase, hand-written RLS migrations, Docker Compose, Cloudflare Workers and Pages, Wrangler

Testing & Delivery: Risk-graded approvals, Playwright, pytest, accessibility checks, security tests, race-condition tests, durable run logs

SELECTED PROJECTS & OPERATIONS

Auretris and Kuanli — WhatsApp Automation and CRM

- Operate a live, multi-tenant SaaS product for an education consultancy and a second client; Auretris uses n8n workflows to answer prospective-student FAQs and route leads.
- Customized and operate Kuanli, a forked open-source CRM, on self-hosted Supabase/Postgres with hand-written RLS migrations and Docker Compose. Publish a sanitized Auretris architecture and operations overview while keeping production assets private.

Claude and Codex Multi-Agent Delivery Pipelines

- Designed a risk-graded R0–R5 review and approval workflow that routes prompt drafting, implementation, architecture review, and solution review across Claude and Codex models by role.
- Designed and operate the Pantheon automated build pipeline that produced Python/FastAPI and JavaScript applications under a formal three-gate protocol covering security, race conditions, seed integrity, and accessibility.

AI Operations and Business Systems

- Administer an always-on Hermes agent runtime with multiple profiles, cron scheduling, Docker/Singularity sandboxes, kanban orchestration, and MCP-based build automation.
- Operate Skeure Education and an Indian Non-Banking Financial Company, combining direct business operations with automation work and exposure to lending, ledger processes, and the NBFC regulatory environment.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD-based pathway and routing design, site-survey interpretation, material take-offs, drawing QA, and field teams for commercial and municipal FTTN/FTTH infrastructure.
- Contributed to the Granville–Broadway ICT upgrade, rural-Alberta telecom backbone expansion, and Vancouver Island fiber-backbone work in Tofino and Campbell River.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20+ member electrical sub-team.

EDUCATION & CREDENTIALS

University of British Columbia — Bachelor of Applied Science, Electrical Engineering; degree conferred May 2024

Engineers and Geoscientists BC — Engineer-in-Training, 2024–present

Lovely Professional University — MBA candidate, in progress; expected 2027

Canadian work authorization — Open Post-Graduation Work Permit for any employer; valid through June 6, 2027
