SUMMARY

Deployment-focused automation and AI-agent engineer who designs and operates production systems for real clients. Hands-on experience spans multi-tenant workflow automation, self-hosted Docker/Postgres infrastructure, local inference, Cloudflare deployments, and risk-graded multi-agent orchestration. Brings customer-facing operating experience, electrical-infrastructure project coordination, and a UBC Electrical Engineering foundation to implementation, troubleshooting, and cross-functional delivery.

CORE SKILLS

Infrastructure & Operations: Docker, Docker Compose, self-hosted Supabase/PostgreSQL, SQL and row-level security, Cloudflare Workers, Pages, Tunnel, and Wrangler

AI-Agent Systems: n8n, Ollama, MCP, prompt engineering, Claude and Codex orchestration, scheduled execution, sandboxed code execution, and per-role model routing

Application & QA Tooling: Python, TypeScript/JavaScript, Next.js, React, Astro, FastAPI, SQLAlchemy, Playwright, Vitest, pytest, Git, and accessibility testing

Client & Engineering Delivery: Production client relationships, deployment administration, AutoCAD, site-survey interpretation, drawing QA, material take-offs, fiber infrastructure, and field coordination

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli | Production Client Systems

- Design and operate a live, multi-tenant SaaS product for an education-consulting business and Skinitutes, combining Auretris n8n workflows for prospective-student FAQs and lead routing with Kuanli, a customized and operated fork of the open-source ArnasDon/wacrm CRM.
- Administer the self-hosted Docker Compose environment, including Supabase/PostgreSQL, hand-written row-level-security migrations, and Ollama local inference, supporting production use and live client relationships.
- Published a sanitized Auretris architecture and operations overview; production workflow exports, client data, credentials, and deployment configuration remain private.

Multi-Agent Build and Operations Systems

- Designed a risk-graded R0–R5 review and approval workflow that routes work across Claude Opus, Claude Sonnet, and Codex by role, with governance appropriate to production-system changes.
- Administer an always-on Hermes agent runtime with multiple profiles, cron scheduling, Docker and Singularity sandboxes, task orchestration, and MCP-based build automation.
- Operate Skeure Education's AIOS fork as a business operations hub and deploy its Astro 7, TypeScript, and Tailwind site to Cloudflare Pages through Wrangler.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Produced AutoCAD-based pathway and routing designs, interpreted site surveys, and prepared material take-offs for commercial and municipal FTTN/FTTH projects.
- Performed QA on engineering drawings and coordinated field teams during installation and commissioning for projects in Vancouver, rural Alberta, and Vancouver Island.
- Supported the Granville–Broadway ICT upgrade, rural-Alberta telecom backbone expansion, and Tofino/Campbell River fiber-backbone upgrade.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Managed documentation, timelines, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — conferred May 2024

MBA, Lovely Professional University — candidate, expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization — Open Post-Graduate Work Permit for any employer, valid through June 6, 2027
