SUMMARY

Automation and AI-agent engineer who designs and operates production automation for real clients, alongside original multi-agent orchestration and governed AI delivery pipelines. Combines TypeScript/React full-stack work, n8n workflow automation, Docker/Postgres operations, and Cloudflare deployment with an electrical-engineering foundation. Runs two active businesses while completing an MBA, bringing hands-on technical and operating judgment to ambiguous customer problems.

CORE SKILLS

Full-Stack Development: TypeScript, JavaScript, Next.js 16, React, Astro 7, Python, SQL, Tailwind

AI & Agent Orchestration: n8n, Claude/Codex role routing, prompt engineering, MCP configuration, Ollama, scheduled and sandboxed agent operations

Data & Delivery: Self-hosted Supabase/Postgres, hand-written RLS migrations, Docker/Docker Compose, Playwright, pytest, gated verification workflows

Cloud & Customer Operations: Cloudflare Workers, Pages, Wrangler, and Tunnel; production client support; no AWS, GCP, or Azure experience to date

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Live WhatsApp Automation and CRM

- Designed and operate Auretris, an n8n workflow set that answers prospective-student FAQs and routes leads for an education consultancy and a second production client.
- Customized, extended, and operate Kuanli, a forked open-source CRM using Next.js, TypeScript, Tailwind, self-hosted Supabase/Postgres, hand-written RLS migrations, Docker Compose, and Ollama.
- Published a sanitized Auretris architecture and operations overview; production workflows, client data, credentials, and deployment configuration remain private.

Multi-Agent Build and Delivery Pipelines

- Designed a risk-graded Claude Code/Codex workflow that routes architecture, implementation, prompt drafting, and review across Opus, Sonnet, and Codex roles.
- Designed and operate a three-gate automated pipeline that produced FastAPI and PWA applications, with security, race-condition, seed-integrity, and accessibility verification.

AIOS Operations Hub and Production Site — Skeure Education

- Operate a customized fork of an AI-operations starter kit as the business hub and deployed an Astro 7, TypeScript, and Tailwind site through Cloudflare Pages and Wrangler.
- Developed original Claude-to-Codex orchestration tooling with ask, review, and implement modes, a single-writer lock, durable run logs, and an OpenSEO MCP data source.

Business Operations — Skeure Education and NBFC

- Operate two active businesses, providing direct education-consulting and regulated financial-services experience; specified a planning-stage, read-only WhatsApp ledger assistant for the NBFC.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD pathway and routing work for commercial and municipal FTTN/FTTH projects, including survey interpretation, material take-offs, drawing QA, and field coordination during installation and commissioning.
- Contributed to the Granville–Broadway ICT upgrade, rural Alberta telecom expansion, and Vancouver Island fiber-backbone upgrade.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — conferred May 2024

MBA candidate, Lovely Professional University — in progress, expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Work authorization: Open Canadian Post-Graduation Work Permit valid through June 6, 2027; authorized to work for any Canadian employer.
