SUMMARY

Automation and AI-agent engineer who designs and operates production workflow automation, multi-agent orchestration, and self-hosted data systems for live client businesses. Combines hands-on n8n, PostgreSQL, Docker, Python, and AI-agent tooling with a rigorous UBC electrical-engineering foundation. Directly operates education-consulting and financial-services businesses, bringing practical P&L exposure, structured problem-solving, and data-informed decision-making to technical implementation work.

CORE SKILLS

AI & Automation: n8n production workflows, multi-agent orchestration, prompt engineering, MCP configuration, Ollama, Python

Data & Systems: PostgreSQL, SQL, self-hosted Supabase, hand-written row-level-security policies, Docker, Docker Compose

Engineering & Quality: Risk-graded reviews, gated verification, security checks, race-condition testing, accessibility testing, technical documentation

Business Operations: P&L exposure, financial and ledger operations, workflow analysis, client-facing production operations

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — WhatsApp Automation and CRM Operations

- Designed and operate n8n workflows that answer prospective-student questions and route leads for an education consultancy; the system also supports a second live client.
- Customized, extended, and operate Kuanli, an open-source WhatsApp CRM fork, using self-hosted Supabase/PostgreSQL, Docker, and hand-written RLS migrations.
- Published a sanitized Auretris architecture and operations overview; production workflow exports, client data, credentials, and deployment configuration remain private.

Multi-Agent Build and Verification Pipelines

- Designed an original risk-graded R0–R5 workflow that routes drafting, architecture review, implementation, and solution review across Claude Opus, Claude Sonnet, and Codex.
- Designed and operate the automated Pantheon pipeline that produced FastAPI and JavaScript applications through a formal three-gate protocol covering security, race conditions, seed integrity, and accessibility.

Skeure Education & Indian NBFC — Business Operations

- Operate two businesses directly, spanning education consulting and regulated lending and ledger operations, with responsibility for operational and P&L decisions.
- Authored a planning-stage specification for a WhatsApp ledger assistant based on the NBFC's Excel workbook, with strict read-only and no-automatic-write safety boundaries.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD routing design, site-survey interpretation, and material take-offs for commercial and municipal FTTN/FTTH infrastructure projects.
- Performed drawing QA and coordinated field teams during installation and commissioning for projects in Vancouver, rural Alberta, and Vancouver Island.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, schedules, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — conferred May 2024

MBA candidate, Lovely Professional University — in progress; expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization: Open Post-Graduation Work Permit valid through June 6, 2027; permits work for any Canadian employer.
