SUMMARY

Automation and AI-agent engineer who operates production workflow automation for real clients and designs original multi-agent orchestration and verification systems. Hands-on experience spans TypeScript/React applications, Python tooling, self-hosted Postgres, Docker, n8n, local inference, and Cloudflare deployments. Brings an Electrical Engineering degree, engineering-project coordination experience, and EGBC Engineer-in-Training standing to reliable, security-aware product delivery.

CORE SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, SQL, React, Next.js, Astro, FastAPI, SQLAlchemy, Pydantic

AI & Automation: n8n, multi-agent orchestration, Claude Code, Codex CLI, MCP configuration, Ollama, prompt and workflow design

Data & Infrastructure: PostgreSQL, self-hosted Supabase, hand-written RLS policies, Docker Compose, Cloudflare Workers, Pages, Wrangler, Tunnel

Testing & Delivery: Playwright, axe-core accessibility testing, pytest, Vitest, risk-graded reviews, gated verification protocols

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Production WhatsApp Automation and CRM

- Operate a live, multi-tenant n8n chatbot that answers prospective-student questions and routes leads for an education consultancy and a second client business.
- Customized, extended, and operate a forked open-source CRM using Next.js, TypeScript, Tailwind, self-hosted Supabase/Postgres, hand-written RLS migrations, Docker Compose, and Ollama local inference.
- Maintain a public, sanitized Auretris architecture and operations overview; production workflow exports, client data, credentials, and deployment configuration remain private.

Claude and Codex Multi-Agent Orchestration

- Designed an original R0–R5 workflow that routes drafting, architecture review, implementation, and solution review across Claude Opus, Claude Sonnet, and Codex by role.
- Developed codex-bridge to coordinate Claude Code, Codex CLI, and an OpenSEO MCP source through ask, review, and implement modes, with a single-writer lock and durable run logs supporting a production website.

Gated AI Build Pipeline and Agent Operations

- Designed and operate the three-gate Pantheon build and review pipeline that produced a Python/FastAPI/SQLAlchemy travel planner and a JavaScript/PocketBase animal-rescue PWA, with security, race-condition, seed-integrity, and accessibility verification.
- Administer an always-on agent runtime built on the open-source NousResearch Hermes Agent, using scheduled execution, configured profiles, sandboxed code execution, and task orchestration.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD-based pathway and routing design, site-survey interpretation, and drawing QA for commercial and municipal FTTN/FTTH projects.
- Produced material take-offs and coordinated field teams during installation and commissioning across projects in Vancouver, rural Alberta, and Vancouver Island.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — conferred May 2024

MBA candidate, Lovely Professional University — in progress; expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canada work authorization: Open Post-Graduation Work Permit valid through June 6, 2027; authorized to work for any employer
