SUMMARY

Early-career engineer bringing rigorous verification, documentation, and coordination experience to software quality assurance. Holds a UBC Bachelor of Applied Science in Electrical Engineering and applies formal testing practices through self-directed automation projects, production client systems, and engineering deliverable reviews. Designed and operates verification-heavy AI build pipelines, administers web application infrastructure, and communicates technical changes across project stakeholders. Interested in developing test plans, executing regression coverage, documenting outcomes, and improving QA processes within a collaborative fintech team.

CORE SKILLS

Testing & QA: Playwright, axe-core accessibility testing, pytest, pytest-asyncio, Vitest, security and race-condition testing, seed-data verification

Test Process: Three-gate verification protocols, review logs, release criteria, engineering drawing QA, safety and regulatory-compliance documentation

Software & Data: Python, TypeScript, JavaScript, SQL, Next.js, React, PostgreSQL, self-hosted Supabase, Docker Compose

Automation & Collaboration: n8n, multi-agent orchestration, revision control, technical documentation, field-team and engineering coordination

SELECTED PROJECTS & OPERATIONS

Automated Build and Verification Pipeline

- Designed and operates the Pantheon AI build-agent pipeline that produced the animal-rescue PWA and budget-aware travel planner under a formal three-gate build and review protocol.
- Directed verification covering security rules, race conditions, seed integrity, and accessibility; animal-rescue contains more than 30 automated verification scripts produced through the pipeline.

Auretris Chatbot and Kuanli CRM

- Operates Auretris, an n8n WhatsApp FAQ and lead-routing system, alongside Kuanli for two live client organizations in a multi-tenant environment.
- Customized, extended, and operates Kuanli as an open-source CRM fork using Next.js, TypeScript, Docker Compose, self-hosted Supabase/PostgreSQL, and hand-written row-level-security migrations.
- Published a sanitized Auretris architecture and operations overview; production workflows, client data, credentials, and deployment configuration remain private.

Financial-Services Operations

- Operates an Indian non-banking financial company, gaining direct exposure to lending, ledger operations, and a regulated financial-services environment.

Lithium-Ion Battery Safety Research

- Conducted electrical testing and failure analysis while contributing to safety protocols and regulatory-compliance work for half-cell characterization and electrode modeling.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Produced AutoCAD pathway and routing designs for commercial and municipal FTTN/FTTH projects using site-survey findings and material take-offs.
- Performed QA on engineering drawings and maintained organized revisions and documentation across projects in Vancouver, rural Alberta, and Vancouver Island.
- Coordinated with field teams during installation and commissioning to keep design information aligned with site conditions.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering — University of British Columbia, conferred May 2024

MBA candidate — Lovely Professional University, expected 2027

Engineer-in-Training — Engineers and Geoscientists BC, 2024–present

Canadian work authorization — Open Post-Graduation Work Permit valid through June 6, 2027
