SUMMARY

AI/automation engineer who designs and operates production workflow automation and multi-agent systems for real businesses. Experience spans n8n, role-routed Claude/Codex orchestration, self-hosted Docker/Postgres services, MCP integrations, and Cloudflare deployment. UBC electrical engineering graduate and EGBC Engineer-in-Training. Authorized to work for any Canadian employer under an open Post-Graduate Work Permit valid through June 6, 2027.

CORE SKILLS

AI & Agent Systems: Multi-agent orchestration, per-role model routing, prompt engineering, MCP configuration and troubleshooting, Ollama local inference

Workflow Automation: Production n8n workflows, AI chatbot operations, scheduled agents, gated AI-assisted delivery, sandboxed execution

Software & Data: Python, TypeScript/JavaScript, SQL, Next.js, FastAPI, SQLAlchemy, Pydantic, PostgreSQL, Supabase

Infrastructure & Testing: Docker Compose, Cloudflare Workers/Pages/Wrangler/Tunnel, Playwright, pytest, accessibility and security verification

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Production WhatsApp Automation and CRM

- Designed and operate Auretris, an n8n-based WhatsApp AI workflow set that answers prospective-student FAQs and routes leads for two live client businesses.
- Customized, extended, and operate Kuanli, a fork of the open-source wacrm project, using Next.js, TypeScript, hand-written Postgres RLS migrations, self-hosted Supabase, and Docker Compose.
- Maintain a sanitized public Auretris architecture and operations overview while keeping production workflows, client data, credentials, and deployment configuration private.

Multi-Agent Build, Review, and Delivery Pipelines

- Designed an original risk-graded R0–R5 workflow that routes work across Claude Opus, Sonnet, and Codex by role, with formal review and approval gates.
- Designed and operate the Pantheon automated build pipeline that produced FastAPI/SQLAlchemy and JavaScript/PocketBase applications through a three-gate verification protocol covering security, race conditions, seed integrity, and accessibility.
- Developed Claude-to-Codex orchestration tooling with ask, review, and implementation modes, a single-writer lock, and durable run logs for business automation work.

Hermes Agent Runtime

- Administer an always-on, multi-profile agent runtime with cron scheduling, Docker and Singularity sandboxes, kanban task orchestration, and MCP-based build workflows.

Skeure Education — Business and Automation Operations

- Operate a forked AIOS starter kit as the operational hub for an education-consulting business, alongside original automation and deployment layers.
- Operate its live Astro, TypeScript, and Tailwind website on Cloudflare Pages and apply automation directly to ongoing business operations.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD pathway and routing design, site-survey interpretation, drawing QA, and material take-offs for commercial and municipal FTTN/FTTH projects.
- Supported field coordination during installation and commissioning across infrastructure projects in Vancouver, rural Alberta, and Vancouver Island.
- Worked with engineering, field, and client stakeholders on fiber-optic and ICT infrastructure upgrades.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — Conferred May 2024

MBA candidate, Lovely Professional University — In progress; expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present
