SUMMARY

Engineering graduate and technical operations professional with experience translating business requirements into database rules and automated workflows, coordinating client-facing infrastructure projects, and operating production data systems. Combines an electrical-engineering foundation with hands-on SQL, PostgreSQL, Python, workflow automation, quality assurance, and business operations. Operates two businesses while completing an MBA and brings a practical understanding of regulated financial operations, client delivery, process flows, and technical implementation.

CORE SKILLS

Data & Databases: PostgreSQL, self-hosted Supabase, SQL, hand-written row-level security migrations, data architecture, process flows

Client Implementation: Requirements translation, project coordination, technical documentation, delivery tracking, drawing QA, field-team coordination

Automation & Systems: Python, n8n, Docker, Docker Compose, Cloudflare Pages, workflow design, self-hosted production systems

Business Operations: Lending and ledger operations, education consulting, live client relationships, MBA candidate expected 2027

SELECTED PROJECTS & OPERATIONS

Kuanli CRM and Auretris WhatsApp Automation

- Customized, extended, and operate a forked open-source CRM using Next.js, TypeScript, and self-hosted Supabase/PostgreSQL for two live client deployments.
- Authored PostgreSQL row-level security migrations and configured database rules and workflows supporting multi-tenant client operations.
- Designed and operate Auretris, an n8n workflow set that answers prospective-student FAQs and routes leads; its public repository contains a sanitized architecture and operations overview, while production workflows, data, credentials, and deployment configuration remain private.

NBFC Operations — India

- Operate a regulated financial-services business with direct exposure to lending, ledger operations, and the Indian NBFC regulatory environment.
- Specified a ledger-first WhatsApp financial assistant based on the business's existing Excel workbook, with read-only and no-automatic-write safety boundaries; the project remains at the design and starter-scaffold stage.

Skeure Education Operations

- Operate an education-consulting business serving students through partner universities including LPU and Amity, with direct business and operational responsibility.
- Operate its technical infrastructure, including a production Astro and TypeScript website deployed through Cloudflare Pages and an actively used forked AI-operations hub with original orchestration tooling layered on top.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver | May 2024 – September 2025

- Coordinated commercial and municipal fiber-optic and telecom projects across Vancouver, rural Alberta, and Vancouver Island, interpreting site surveys and preparing AutoCAD routing designs and material take-offs.
- Performed quality assurance on engineering drawings and coordinated documentation, timelines, and field teams during installation and commissioning activities.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021 – August 2023

- Maintained documentation, timelines, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — degree conferred May 2024

MBA Candidate, Lovely Professional University — in progress, expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization: Open Post-Graduation Work Permit valid for any employer through June 6, 2027
