SUMMARY

Automation developer with hands-on experience designing and operating production n8n workflows, WhatsApp AI automation, and self-hosted systems for real clients. Combines workflow orchestration, multi-tenant infrastructure operations, and structured technical documentation with an electrical-engineering foundation. Experienced in direct client relationships, field-team coordination, quality assurance, and formal review processes. Brings a practical understanding of how small organizations adopt, operate, and support automation alongside an MBA currently in progress.

CORE SKILLS

Automation: n8n production workflows, WhatsApp AI automation, workflow routing, scheduled agent execution

Development: Python, TypeScript/JavaScript, SQL, Next.js, PostgreSQL, Supabase

Infrastructure & AI: Docker Compose, self-hosted systems, Ollama, Claude/Codex multi-agent orchestration

Delivery: Architecture and operations documentation, formal review gates, QA, revision control, client coordination

SELECTED PROJECTS & OPERATIONS

Auretris — WhatsApp AI Automation

- Designed and operate a live n8n workflow set that answers prospective-student FAQs and routes leads for an education-consulting business, providing production automation for a real client relationship.
- Maintain a public, sanitized architecture and operations overview; production workflow exports, client data, credentials, and deployment configuration remain private.

Kuanli — WhatsApp CRM Operations

- Customized, extended, and operate a forked open-source WhatsApp CRM supporting two production clients alongside Auretris, using Next.js 16, TypeScript, Tailwind, and Docker Compose.
- Administer self-hosted Supabase and PostgreSQL infrastructure and wrote row-level-security migrations supporting the product's multi-tenant data model.

Multi-Agent Automation Tooling

- Designed an original risk-graded workflow that routes work across Claude Opus, Claude Sonnet, and Codex through defined roles and R0–R5 review and approval levels.
- Created model-routing policies, reusable Claude Code skills, and formal governance for a production build system, including structured review responsibilities and controlled implementation handoffs.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Produced AutoCAD-based pathway and routing designs for commercial and municipal fiber-optic and telecom projects, including FTTN and FTTH infrastructure.
- Interpreted site surveys, prepared material take-offs, and performed quality assurance on engineering drawings for projects in Vancouver, rural Alberta, and Vancouver Island.
- Coordinated with field teams during installation and commissioning, translating technical requirements into actionable project documentation.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team supporting a university engineering design program.

EDUCATION & CREDENTIALS

MBA candidate, Lovely Professional University — Expected 2027

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — May 2024

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present
