SUMMARY

Automation engineer who designs and operates production workflow automation and multi-agent AI systems for client-facing businesses. Combines hands-on n8n, self-hosted data, Docker, and AI orchestration experience with electrical-engineering rigor and practical stakeholder coordination. Focused on translating operational bottlenecks into reliable tools, clear verification gates, and maintainable workflows.

CORE SKILLS

Automation & AI: n8n, multi-agent orchestration, Claude/Codex model routing, Ollama, MCP configuration

Development & Integration: Python, TypeScript/JavaScript, SQL, REST APIs, webhooks, FastAPI, Next.js, Astro

Data & Infrastructure: PostgreSQL, self-hosted Supabase, hand-written RLS policies, Docker Compose, Cloudflare Pages/Workers/Wrangler

Operations & Quality: Workflow analysis, stakeholder coordination, gated reviews, security checks, accessibility testing, documentation control

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Client Workflow Automation

- Design and operate Auretris n8n workflows that answer prospective-student FAQs and route leads within a live, multi-tenant WhatsApp AI product serving an education consultancy and a second client.
- Customized, extended, and operate Kuanli, a forked open-source Next.js and TypeScript CRM, using self-hosted Supabase/PostgreSQL, hand-written row-level-security migrations, and Docker Compose.

Multi-Agent Build and Review Systems

- Designed an original R0–R5 risk-graded workflow that routes work among Claude Opus, Claude Sonnet, and Codex by role, with review, approval, and model-routing policies.
- Design and operate the Pantheon automated build pipeline that produced FastAPI and JavaScript applications under a formal three-gate protocol covering security, race conditions, seed integrity, and accessibility.

Business Operations and Automation

- Operate Skeure Education and its forked AI-operations hub, with an original Claude–Codex bridge, durable run logs, a single-writer lock, and a production Astro site deployed through Cloudflare Pages.
- Operate an Indian NBFC with lending and ledger responsibilities; specified a planning-stage, ledger-first WhatsApp assistant with read-only and no-automatic-write safety boundaries.

Hermes Agent Runtime

- Administer an always-on runtime built on the open-source Hermes agent, including multiple profiles, cron scheduling, kanban orchestration, and Docker or Singularity sandboxed execution.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Produced and coordinated AutoCAD-based pathway and routing work, site-survey interpretation, and material take-offs for commercial and municipal FTTN/FTTH projects.
- Performed drawing QA and coordinated field teams during installation and commissioning across three named telecom infrastructure projects in Vancouver, rural Alberta, and Vancouver Island.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

University of British Columbia — Bachelor of Applied Science, Electrical Engineering, conferred May 2024

Lovely Professional University — MBA candidate, expected 2027

Engineers and Geoscientists BC — Engineer-in-Training, 2024–present
