SUMMARY

Automation and AI-agent engineer who designs and operates production workflow automation, multi-agent orchestration, and self-hosted infrastructure for live businesses. Hands-on experience includes n8n, PostgreSQL, Docker, role-based model routing, access-control policies, and verification-heavy AI build pipelines. Combines this self-directed software practice with a University of British Columbia electrical-engineering foundation and direct commercial operating experience.

CORE SKILLS

AI Agents & Automation: n8n production workflows, multi-agent orchestration, Claude Opus/Sonnet and Codex routing, MCP configuration, prompt engineering, Ollama

Data & Applications: PostgreSQL, self-hosted Supabase, hand-written row-level-security migrations, SQLite, Python, TypeScript, SQL, Next.js, React, Astro, FastAPI

Engineering Practice: Git, Docker/Docker Compose, pytest, Playwright, Vitest, security checks, race-condition testing, seed-integrity verification, accessibility testing

Cloud & Delivery: Cloudflare Workers, Pages, Wrangler, and Tunnel; Cloudflare is the sole cloud platform in active use, with no AWS, GCP, or Azure experience

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Production WhatsApp Automation

- Operate Auretris, a production n8n workflow set that answers prospective-student questions and routes leads for real clients within a live, multi-tenant SaaS deployment.
- Customized, extended, and operate Kuanli, a forked open-source WhatsApp CRM using Next.js, TypeScript, self-hosted Supabase/PostgreSQL, Docker Compose, and hand-written RLS migrations.

Multi-Agent Build and Review Pipelines

- Designed and operate an original risk-graded R0–R5 workflow that assigns architecture, implementation, and review responsibilities across Claude Opus, Sonnet, and Codex.
- Designed and operate the Pantheon automated pipeline that produced FastAPI and PocketBase applications under a three-gate protocol covering security, race conditions, seed integrity, and accessibility.

Skeure Education — AI Operations and Deployment

- Operate a forked AI-operations platform as the working hub for an education-consulting business, with original Claude–Codex orchestration tooling featuring a single-writer lock and durable run logs.
- Deploy and maintain a production Astro, TypeScript, and Tailwind website on Cloudflare Pages through Wrangler.

Business and Agent Operations

- Operate Skeure Education and an Indian non-banking financial company, providing direct exposure to P&L, commercial operations, lending and ledger processes, and regulated financial-services work.
- Administer an always-on agent runtime with multiple profiles, cron scheduling, sandboxed execution, kanban task orchestration, and MCP-based build coordination.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD routing design, site-survey interpretation, material take-offs, and field activity for commercial and municipal FTTN/FTTH infrastructure projects.
- Performed QA on engineering drawings and supported installation and commissioning coordination across projects in Vancouver, rural Alberta, and Vancouver Island.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — Conferred May 2024

MBA Candidate, Lovely Professional University — In progress; expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present
