SUMMARY

Automation and AI-agent engineer who designs and operates production workflows, multi-agent orchestration systems, and self-hosted business software. Hands-on experience includes n8n automation for live clients, a customized WhatsApp CRM fork, risk-graded AI build pipelines, and an always-on agent runtime. Combines this technical work with direct operations experience across an education-consulting business and an Indian non-banking financial company, supported by a UBC electrical-engineering degree and an MBA in progress.

CORE SKILLS

Automation & Agents: n8n production workflows, multi-agent orchestration, prompt engineering, MCP configuration, Claude Code skills

Languages & Applications: Python, TypeScript/JavaScript, SQL, Next.js, React, Astro, FastAPI

Infrastructure & Data: Docker Compose, self-hosted Supabase/PostgreSQL, Postgres RLS policies, Ollama, Cloudflare Pages and Wrangler

Operations & Quality: Workflow design, gated reviews, sandboxed execution, documentation control, engineering QA, business operations

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Client Automation Systems

- Operate Auretris n8n workflows that answer prospective-student FAQs and route leads within a live, multi-tenant WhatsApp SaaS product serving two client businesses.
- Customized, extended, and operate Kuanli, an open-source CRM fork using Next.js, TypeScript, self-hosted Supabase/PostgreSQL, hand-written RLS migrations, Docker Compose, and Ollama.
- Published a sanitized Auretris architecture and operations overview; production workflow exports, client data, credentials, and deployment configuration remain private.

Multi-Agent Build and Review Pipeline

- Designed and operate an original R0–R5 risk-graded workflow that routes work among Claude Opus, Sonnet, and Codex for architecture, implementation, and review.
- Authored reusable Claude Code skills and role-specific routing policies supporting governed, verification-focused AI-assisted delivery.

Hermes — Always-On Agent Operations

- Administer a personal, multi-profile AI agent runtime with cron scheduling, Docker and Singularity sandboxes, task orchestration, configured skills, and MCP-based build orchestration.

Skeure Education & NBFC — Business Operations

- Operate an education-consulting business and its AI-operations hub, including a production Astro and TypeScript website deployed through Cloudflare Pages.
- Operate an Indian non-banking financial company with exposure to lending, ledger operations, and its regulatory environment; specified a planning-stage, read-only WhatsApp ledger assistant based on an existing Excel workbook.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver | May 2024–September 2025

- Produced AutoCAD-based pathway and routing designs, interpreted site surveys, completed material take-offs, and performed drawing QA for commercial and municipal FTTN/FTTH projects.
- Coordinated field teams during installation and commissioning for telecom infrastructure work in Vancouver, rural Alberta, and Vancouver Island.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — Conferred May 2024

MBA candidate, Lovely Professional University — In progress, expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Work authorization: Open Canadian Post-Graduation Work Permit; any employer; valid through June 6, 2027
