SUMMARY

Automation and AI-agent engineer who designs and operates production workflow automation, multi-agent orchestration systems, and self-hosted infrastructure for real clients. Experience spans n8n conversational workflows, model-routing and approval systems, Docker-based deployments, PostgreSQL administration, gated verification, and scheduled agent operations. UBC Electrical Engineering graduate and EGBC Engineer-in-Training with experience translating operational needs into reliable technical systems.

CORE SKILLS

AI and Automation: n8n, multi-agent orchestration, prompt engineering, MCP configuration, Ollama, Claude and Codex routing

Software: Python, TypeScript/JavaScript, SQL, Next.js, React, Astro, FastAPI, Pydantic, Bash

Data and Infrastructure: PostgreSQL, self-hosted Supabase, hand-written RLS migrations, SQLite, Docker Compose, Cloudflare Pages, Workers, Wrangler

Testing and Delivery: Playwright, pytest, accessibility testing, security checks, race-condition testing, gated review workflows

SELECTED PROJECTS & OPERATIONS

Auretris and Kuanli — Production WhatsApp Automation

- Operate a live, multi-tenant n8n chatbot that answers prospective-student questions and routes leads for an education consultancy and a second client.
- Customized, extended, and operate a forked open-source Next.js CRM backed by self-hosted Supabase/PostgreSQL for live client use.
- Maintain a public, sanitized Auretris architecture and operations overview; production workflows, client data, credentials, and deployment configuration remain private.

Multi-Agent Build and Governance Pipeline

- Designed a risk-graded R0–R5 workflow that assigns drafting, architecture, implementation, and review work across Claude and Codex models by role.
- Designed and operate the automated pipeline that produced FastAPI and JavaScript applications under a three-gate protocol covering security, race conditions, seed integrity, and accessibility.

AIOS Operations Hub — Skeure Education

- Operate a customized AIOS fork as a live business hub, with an original Astro/TypeScript site deployed through Cloudflare Pages and orchestration tooling connecting Claude Code, Codex CLI, and an OpenSEO MCP source.

Hermes Agent Runtime

- Administer an always-on agent system with multiple profiles, cron scheduling, Docker and Singularity sandboxes, kanban task orchestration, and MCP-based build operations.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver | May 2024–September 2025

- Coordinated AutoCAD pathway and routing design for commercial and municipal fiber-optic projects, including FTTN and FTTH infrastructure.
- Interpreted site surveys, prepared material take-offs, performed drawing QA, and coordinated field teams during installation and commissioning.
- Supported the Granville–Broadway ICT upgrade, rural Alberta telecom expansion, and Vancouver Island fiber-backbone work in Tofino and Campbell River.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, schedules, and revision control for an electrical sub-team of more than 20 members.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — Conferred May 2024

MBA candidate, Lovely Professional University — In progress; expected 2027

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization: Open Post-Graduation Work Permit for any employer, valid through June 6, 2027
