SUMMARY

Project Coordinator with direct experience supporting commercial and municipal fiber-optic and telecom infrastructure projects through AutoCAD-based pathway and routing design, site-survey interpretation, material take-offs, engineering drawing quality assurance, and field-team coordination during installation and commissioning. UBC electrical-engineering graduate and EGBC Engineer-in-Training with additional experience maintaining documentation, timelines, and revision control for a 20+ member technical team. Combines engineering rigor with hands-on responsibility for operating two businesses and production automation systems serving real clients.

CORE SKILLS

Project Coordination: Project documentation, timeline tracking, revision control, material take-offs, engineering drawing QA

Electrical Infrastructure: AutoCAD pathway and routing design, site-survey interpretation, fiber-optic networks, FTTN/FTTH

Field Delivery: Installation and commissioning coordination, commercial and municipal project environments

Operations & Tools: AutoCAD, n8n, Docker, PostgreSQL, multi-tenant client operations

SELECTED PROJECTS & OPERATIONS

Business Operations — Skeure Education and Indian NBFC

- Operate an education-consulting business serving students through relationships with LPU, Amity, and other partner universities while maintaining direct exposure to business operations and P&L responsibilities.
- Operate an Indian non-banking financial company, gaining hands-on familiarity with lending, ledger operations, and the regulatory environment for NBFCs.

Client Automation Operations — Auretris and Kuanli

- Designed and operate Auretris, a live n8n-based WhatsApp AI workflow set that answers prospective-student questions and routes leads for real production clients.
- Customized, extended, and operate Kuanli, an open-source WhatsApp CRM fork deployed with Next.js, TypeScript, Docker Compose, and self-hosted PostgreSQL/Supabase.

Battery Safety Research — University of British Columbia

- Conducted electrical testing and failure analysis for lithium-ion half-cell characterization and electrode modeling, contributing to safety-protocol and regulatory-compliance work.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated work for commercial and municipal fiber-optic and telecom infrastructure projects using FTTN and FTTH technologies.
- Supported the Granville-Broadway ICT infrastructure upgrade, rural-Alberta telecom backbone expansion, and Tofino/Campbell River fiber backbone upgrade.
- Produced AutoCAD-based pathway and routing designs, interpreted site surveys, and prepared material take-offs for project delivery.
- Performed quality assurance on engineering drawings and coordinated field teams during installation and commissioning activities.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20+ member electrical sub-team.
- Supported mechatronics work and helped keep technical records and team deliverables organized throughout the design cycle.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering — University of British Columbia, conferred May 2024

MBA candidate — Lovely Professional University, expected 2027; degree in progress

Engineer-in-Training — Engineers and Geoscientists BC, 2024–present

Canadian work authorization — Open Post-Graduate Work Permit valid through June 6, 2027; authorized to work for any employer
