SUMMARY

Automation and AI-agent engineer with hands-on experience designing and operating production workflows, multi-agent development systems, and full-stack applications produced through governed AI pipelines. Operate live WhatsApp automation and a customized CRM for real clients, supported by practical experience with Python, TypeScript, APIs, Postgres, Docker, Cloudflare, and automated testing. UBC Electrical Engineering graduate and Engineer-in-Training with infrastructure-project coordination and financial-services operating experience.

CORE SKILLS

AI & Automation: Claude Code, Codex, multi-agent orchestration, prompt engineering, n8n, MCP, Ollama, agent-role routing, risk-graded review workflows

Languages & Frameworks: Python, TypeScript/JavaScript, SQL, Next.js, React, Astro, FastAPI, SQLAlchemy, Pydantic

Data & Infrastructure: PostgreSQL, hand-written RLS policies, self-hosted Supabase, SQLite, Docker Compose, Cloudflare Workers, Pages, Wrangler, and Tunnel

Testing & Delivery: Git, Playwright, axe-core accessibility testing, pytest/pytest-asyncio, Vitest, gated security and integrity verification

SELECTED PROJECTS & OPERATIONS

Multi-Agent Development Orchestration

- Designed and operate a risk-graded R0–R5 review and approval workflow that routes work across Claude Opus, Sonnet, and Codex according to defined roles, risk, and governance requirements.
- Authored reusable Claude Code skills and original Claude-to-Codex tooling with ask, review, and implement modes, a single-writer lock, and durable run logs.

Auretris & Kuanli — Live WhatsApp Automation

- Designed and operate Auretris, an n8n workflow set that answers prospective-student questions and routes leads for an education-consulting client.
- Customized, extended, and operate Kuanli, a fork of the open-source wacrm CRM, using Next.js, TypeScript, Tailwind, self-hosted Supabase/Postgres, hand-written RLS migrations, Docker Compose, and Ollama for production clients.
- Maintain a sanitized public Auretris architecture and operations overview; production workflows, client information, credentials, and deployment configuration remain private.

Pantheon Automated Build Pipeline

- Designed and operate the automated pipeline that produced a FastAPI/SQLAlchemy travel planner and a PocketBase rescue-animal PWA under a formal three-gate protocol; animal-rescue includes 30+ verification scripts covering security rules, race conditions, seed integrity, and accessibility.

Business & Financial-Services Operations

- Operate Skeure Education and an Indian NBFC, providing direct exposure to education operations and regulated lending and ledger processes; specified a planning-stage, read-only WhatsApp financial assistant with explicit no-auto-write boundaries.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd.

Vancouver, BC | May 2024–September 2025

- Coordinated AutoCAD-based pathway and routing design for commercial and municipal FTTN/FTTH projects, interpreting site surveys and preparing material take-offs.
- Performed drawing QA and supported field-team coordination during installation and commissioning for the Granville–Broadway ICT upgrade and fiber-backbone work in rural Alberta and Vancouver Island.
- Maintained project documentation and drawing quality across multidisciplinary infrastructure delivery activities.

Design Team Admin & Mechatronics Support | UBC Baja

September 2021–August 2023

- Managed documentation, timelines, and revision control for a 20+ member electrical sub-team while providing mechatronics support.

EDUCATION & CREDENTIALS

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — conferred May 2024

MBA candidate, Lovely Professional University — expected 2027; in progress

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization: Open Post-Graduation Work Permit valid through June 6, 2027; authorized to work for any employer in Canada
