SUMMARY

AI automation and agent-operations practitioner who designs and operates production workflows, multi-agent orchestration, and governed delivery pipelines for real businesses. Combines hands-on experience with client-facing automation, business operations, financial-services processes, and technical project coordination. Electrical Engineering graduate, Engineer-in-Training, and MBA candidate experienced in translating operational needs into maintainable systems with review, testing, and approval controls.

CORE SKILLS

AI & Automation: n8n, prompt engineering, agent configuration, MCP, Claude and Codex orchestration, Ollama

Applications & Data: Python, TypeScript/JavaScript, Next.js, React, Astro, SQL, PostgreSQL, Supabase, hand-written RLS policies

Infrastructure & Quality: Docker Compose, Cloudflare Workers and Pages, Wrangler, Playwright, pytest, verification gates, self-hosted systems

Operations: Production client support, workflow administration, business operations, regulated NBFC processes, technical coordination

SELECTED PROJECTS & OPERATIONS

Auretris & Kuanli — Production WhatsApp Automation

- Designed and operate Auretris, an n8n workflow set that answers prospective-student FAQs and routes leads for an education-consulting business; the system also supports Skinitutes as a second client.
- Customized, extended, and operate Kuanli, a forked open-source CRM using Next.js, TypeScript, self-hosted Supabase/Postgres, hand-written RLS migrations, Docker Compose, and Ollama for local inference.

Multi-Agent Build and Review Pipelines

- Designed an original R0–R5 risk-graded workflow that routes work across Claude Opus, Claude Sonnet, and Codex by role, supported by prompt engineering and formal review and approval controls.
- Designed and operate the Pantheon automated build pipeline that produced budget-aware travel and animal-rescue applications through a three-gate protocol covering security, race conditions, seed integrity, and accessibility testing.

Skeure Education and Financial-Services Operations

- Operate a customized fork of an AI-operations starter kit as Skeure Education's business hub, alongside an Astro and TypeScript production website deployed to Cloudflare Pages through Wrangler.
- Developed original orchestration tooling that coordinates Claude Code, Codex CLI, and an SEO data source using ask, review, and implement modes, a single-writer lock, and durable run logs.
- Operate Skeure Education and an Indian Non-Banking Financial Company, providing direct exposure to P&L and business operations, lending and ledger processes, and a regulated financial-services environment.

PROFESSIONAL EXPERIENCE

Project Coordinator, Electrical Infrastructure | InfiSol Technical Services Ltd. — May 2024–September 2025

- Produced AutoCAD-based pathway and routing designs for commercial and municipal FTTN/FTTH projects using site-survey information, material take-offs, and engineering-drawing QA.
- Coordinated field teams during installation and commissioning across projects in Vancouver, rural Alberta, and Vancouver Island.

Design Team Admin & Mechatronics Support | UBC Baja — September 2021–August 2023

- Maintained documentation, timelines, and revision control for a 20-plus-member electrical sub-team while providing mechatronics support.

EDUCATION & CREDENTIALS

MBA candidate, Lovely Professional University — Expected 2027; in progress

Bachelor of Applied Science, Electrical Engineering, University of British Columbia — Conferred May 2024

Engineer-in-Training, Engineers and Geoscientists BC — 2024–present

Canadian work authorization: Open Post-Graduate Work Permit valid through June 6, 2027; authorized to work for any Canadian employer.
